EDUCATION

Amritsar Group of Colleges

B.Tech: Computer Science and Engineering (CSE) | 2023 – Present

CGPA: 7.89

Radiant Higher Secondary School

Higher Secondary Education | Mar 2022 – Mar 2023

Percentage: 81%

TECHNICAL SKILLS

Languages: JavaScript, Java(DSA)

Frontend: React.js, HTML5, SCSS, Context API, Axios

Backend: Node.js, Express.js, REST API Design, JWT, MVC Architecture

Databases: MongoDB, Mongoose ODM, Schema Design, Indexing

Tools & Platforms: Git, GitHub, Postman, Render, Vercel, ImageKit, Cloudinary, Cursor, Claude AI

Core CS Concepts: Data Structures & Algorithms, OOP, Authentication & Authorization, RBAC

PROJECTS

AI-Powered Resume Builder — Node.js, Express.js, React.js, MongoDB, Google Gemini AI

- Engineered a full-stack MERN application integrating Google Gemini AI to parse resumes, detect skill gaps, and auto-generate ATS-optimized resume content with interview Q&A.
- Implemented JWT-based authentication with token blacklisting, and Zod schema validation to enforce type-safe AI response structures, reducing runtime errors.
- Automated PDF resume generation using Puppeteer headless browser, rendering Gemini-produced HTML into professionally formatted, downloadable documents.
- Designed MongoDB Atlas schemas via Mongoose for persistent storage of user profiles, AI interview reports, and application state; built Axios service layer for clean API communication.

PayrollPro (In Development) — Node.js, Express.js, React.js, MongoDB, JWT, Chart.js

- Developing an enterprise-grade payroll platform with JWT authentication, Role-Based Access Control (Admin, HR, Manager, Employee), and bcrypt password hashing for end-to-end security.
- Building an OTP-based password reset flow via Nodemailer and a complete Employee Management CRUD module covering personal data, banking details, and wage configuration.
- Engineering an automated batch payroll engine computing gross pay, income tax, National Insurance, pension, and student loan deductions — logging immutable PayrollRun documents for full audit history.
- Designing MongoDB data models for multi-role payroll workflows; integrating Chart.js analytics dashboard and jsPDF/html2canvas for one-click PDF report exports.

Bank Ledger — Node.js, Express.js, MongoDB

- Built a financial ledger backend to record, track, and manage debit/credit transactions with secure bcrypt-hashed user authentication.
- Architected MVC-structured Express.js REST APIs with input-validation middleware, centralised error handling, and consistent JSON response formatting.
- Configured Nodemailer for transactional email notifications and optimised MongoDB queries for reliable, performant data storage.

CERTIFICATIONS

- Certified in Node.js by Internshala Trainings — 6-week course covering Node.js, Express.js, and MongoDB integration.
- Certified in Node.js under Skill India / NSDC (Scholiverse Educare Pvt. Ltd.) — Government-recognised certification, Grade A.

ACHIEVEMENTS

- Solved 80+ DSA problems on LeetCode, strengthening problem-solving across arrays, string, and linked list algorithms.
- Actively use Claude (Anthropic) for system architecture planning, code reviews, and backend development workflow acceleration.
- Leverage Cursor and Antigravity AI-powered IDEs for intelligent code completion, refactoring, and debugging across full-stack Node.js projects.
